1) enclosure without adapter, threaded on the body, to be used only with a complete cable gland.

panel cut-out for bulkhead mounting housings

**IMPORTANT NOTE:** The enclosures ensure IP66/IP69 degree of protection (or IP65 for hinged cover versions) when mated and locked with the closing levers. The cover (CS, CP) only ensures mechanical protection, but does not ensure IP65 degree of protection.

## TECHNICAL FEATURES

### CHC 48 LG

Equipped with stainless-steel locking lever and edge sealing gasket, this cover is suitable to close a “104.62” connector hood with 2 pegs (see CN.19 p. 430), to provide:

- **IP65** degree of protection if the cable gland or fitting is insulating type without gasket, or
- **IP66/IP69** if the cable gland/conduit fitting is equipped with O-ring,

in installations where the free connector would otherwise be expected to remain for prolonged time unmated, thus open and unduly exposed to environmental conditions affecting the contacts and relevant terminations.

Cover attachable to the free cable assembly terminating with a “104.62” connector hood by means of the dedicated stainless-steel loop cord.

**RoHS:** compliant without exemptions.
